Suggested Immunizations
Travel to China – Summer

Students taking part in the summer China programs with SYA (School Year Abroad) may receive information from SYA regarding vaccines that they may recommend for participants in their programs. The Lawrenceville School would like to make you aware of what would be required for a student traveling to China on one of our School programs.

Our recommendations for a student taking part in a Lawrenceville School summer trip to China would be that the student be up-to-date on their childhood immunizations which includes Tdap, Tetanus, Polio, MMR, Hepatitis A and B, Meningitis and the Varicella vaccine if there has been no documentation of chickenpox disease. In addition, when Lawrenceville arranges travel to China for our student programs we recommend that students have the Typhoid, Japanese Encephalitis (2-shot series) and Rabies (3-shot series) vaccines. Because we don’t know the exact location for all of the activities in the program we recommend that you contact SYA directly to ask specifically about the need for Malaria medication.

The Lawrenceville School will cover the cost of any non-routine vaccines administered by the School for these programs; reimbursement will not be made for vaccines administered off-campus.

- Please go to the ISOS’s website for more information and enter our ISOS membership number 11BCAS088163. We want families to access this website to read about the security and health information and advice ISOS provides its members.
  https://www.internationalsos.com/private/consumerPortal/

We refer to ISOS for all of our trip vaccine recommendations/requirements and find their information regarding vaccines invaluable. If you would like to have any of the vaccines mentioned above administered by The Lawrenceville School we must have your signed document returned to either my attention, or directly returned to the Health and Wellness Center by January 13, 2020.

The form should be mailed, or emailed to Louise Wright or it can be faxed to the Health and Wellness Center at 609-895-2056. We need to have this form back by January 13, 2020 so the Health and Wellness Center can order the proper amount of vaccines.

I give permission for The Lawrenceville School to administer the necessary immunizations to my child, __________________________.
